

RU933 (WTMD)

ARIOTEK® Walk Through Metal Detector

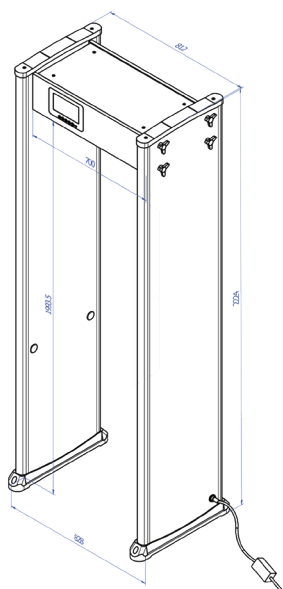

Key Features

- 33 programmable areas
- Counter of people and alarms
- Remote control
- Used in high traffic environments
- 7-inch full color monitor screen

Walk Through Metal detector (WTMD) using advanced digital technology. It can identify a variety of metal devices with a person. These gates have high security, many applications, high sensitivity and wide range detection and diagnosis. They can also be used 24 hours a day. This device has audible and visual alerts.

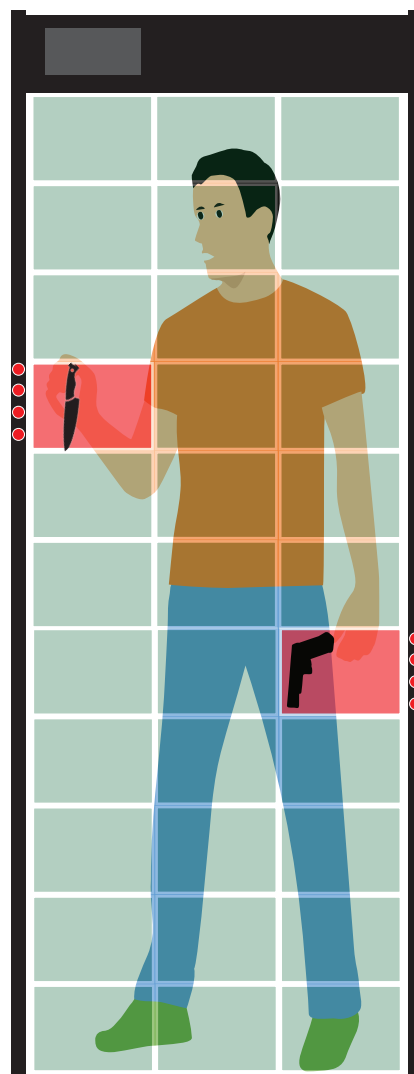

Specifications

Number Of Detect Zones	33
Counting And Statistics Function	Statistics Of Personnel Throughput Alarm Times
Password Protection Settings	Three Levels Of Security Four Digits Password
Body Material	MDF
Adjustable Sensitivity In Each Area	1-255
Alarm	Audible And Visual Alarms
Options For The Alarm Sound	On And Off/ High, Low And Off
Weight	80 Kg
Dimensions Of Outer Frame (Cm)	61 (L)×82(W)×222(H) (cm)
Dimensions Of Inner Frame (Cm)	55 (L)×70(W)×200(H) (cm)
Operation Temp	-20° C to +45° C
Pulse Technology	Digital Signal Processing Filtering System Excellent Anti- Interference Ability
Accessory	Remote Control Adaptor And Power Cable
Ability to work with battery charging	4 Hours
The frequency of the device	5 - 8 kHz
Magnetic flux density Max	21µT

Standard Features

- Full protection on inspection
- ability to detect weapons in different parts of the body
- Very high inspection speed
- Ideal immunity against the effects of side waves
- Has international protection standards
- Operating with all international standards
- Ability to program the device remotely and through the network
- Ability to adjust the sensitivity of the metal detector gate
- Inspection speed 15 meters per second
- Automatic synchronization of several devices with each other
- No need for periodic calibration
- Based on the INSO8567 standard (Iran national standard), the amount of radiation produced by this device is less than Radiation limits people and jobs for VLF electromagnetic waves.
